# About Our Company

Life care plans are the best way to ensure that you and your loved ones have an adequate plan in place for future care throughout your life expectancy. Intercoastal Consulting & Life Care Planning can help ensure that the injured, disabled or chronically-ill person has an adequate plan that addresses future care throughout their life expectancy. Life care plans are different from most other types of insurance policies because they're designed to address both qualitative and quantitative medical and quality-of-life needs for individuals involved in catastrophic and non-catastrophic injuries. A non-catastrophic plan applies to individuals with long-term medical needs and serious impairments. While individuals can still work and perform activities of daily living (ADL), there is noted difficulty and loss of life quality. Examples include soft-tissue injuries, disc herniations, instability of the spine, and/or chronic pain. If you need a life care planner in Jacksonville, get in touch with us!
